

10 MAY 1967

MEMORANDUM FOR: All TAD Personnel

SUBJECT : Reorganization

1. The attached organization chart of the Trajectory Analysis Division is effective 10 May 1967. A general description of the duties of each component of TAD is given below.

2. The Analysis Branch is responsible for carrying out analyses of missile and space events and for preparing contributions to FMSAC event reports. This branch will also undertake ad hoc analyses on request. It is expected that in carrying out these tasks primary emphasis will be placed on using existing techniques and computer programs. 25X1B 25X1B

3. The Signature Branch is concerned with analyzing [redacted] section and [redacted] from missile and space systems. An increased effort will also be made to contribute to the ABM analysis activities of DSD in whatever may seem fruitful.

4. The Techniques Development Branch has the responsibility of developing new or improved analysis techniques and computer programs which will result in more effective use of data, and/or increased timeliness of analyses.

5. The Technical Assistant will carry out tasks of special importance as directed. These tasks may be related to technique development, analysis, or collection.

6. The above descriptions are not intended to establish rigid boundaries between the tasks of each component. Rather, it is expected that they will be viewed as guidelines, and that use will be made of specialized knowledge and capabilities wherever it may exist in the Division.

25X1A [redacted]

Chief
Trajectory Analysis Division
